DETAILED ACTION

Applicant's preliminary amendment filed 25 February 2004 has been received and entered into the instant application. Claims 1-31 have been canceled and claims 32-35 have been added.

Specification

Applicant's claim of priority in the first paragraph of the specification is noted. Applicant should also update the status of all applications in this paragraph.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 32 and 35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

First, the claims recite "polypeptide consisting of OCIF protein" and "polypeptide comprising OCIF protein". It is not clear what is intended by this language, since it is not clear how a protein consists of a protein or comprises a protein. The protein is just that - the protein. The polypeptide could consist or comprise an amino acid sequence

Art Unit: 1646

of a protein, but as the claims are currently drafted, it is not clear what is intended. The claims may even be attempting to encompass compositions, but it is not clear.

Second, the claims recite "OCIF protein", which is indefinite. There is no structure associated with this term and there is no art accepted meaning of this term at the time the instant invention was filed. Therefore, the metes and bounds of what is to be encompassed by this term are unclear and the claims are indefinite.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 33 and 34 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-2 of prior U.S. Patent No. 6,855,808. This is a double patenting rejection.

Conclusion

No claim is allowed.
